

Wayne County Guide to COVID-19

What is the 2019 Novel Coronavirus & How to Protect Yourself

The Wayne County Public Health Division presents this guide to help explain the new virus that our nation and the world is facing: the 2019 Novel Coronavirus.

The 2019 Novel Coronavirus is the virus that causes the respiratory disease called “COVID-19.” The virus originated in China and began circulating in humans in December 2019. While little is currently known about the virus, its symptoms range from mild to severe.
