Water Department General Information

Jefferson Water Main:

Starting in the Spring of 2013 the City of Gibraltar will be undertaking a large water main replacement program along Jefferson Rd. between Middle Gibraltar and North Gibraltar Rd. The above referenced main dates **back to the 1920's** and is the primary feed into the City. Because of the depth of the main, any main breaks require outside contractors to perform the repair. Costs to do the repairs can range between \$30,000- \$40,000.

Engineer's estimates to perform the main replacement range between \$423,182.63 and \$493,745.19.

Funding for the proposed work will come from water bill revenue and will insure a reliable high quality service feed to the City.

City of Gibraltar Community Newsletter • 51th Edition

Delinquent Water Bills: If you have delinquencies on your water account, effective May 17, 2013 these delinquencies will be forwarded to your summer 2013 tax bill. In addition to the arrearage amount, a 25% fee will be assessed on the amount of arrearage. To avoid the 25% penalty please contact 734-676-8982 to make arrangements to pay the delinquency prior to the previously mentioned due date.

Water Bill Reminder: When you receive your quarterly water bill, please remember to check your water meter reading with the listed numbers of gallons on the bill. Your meter should read higher than the billing information. If there are any discrepancies, please notify the Water Department immediately at (734) 676-8982. Discrepancies are the responsibility of the property owner.

As a reminder, your quarterly water bills are mailed out at the end of January, April, July, and October. Water bills are then due by the 10th of the following month. Water bills are payable at City Hall, 29450 Munro Avenue, Gibraltar, MI 48173.

bundles not exceeding 4 feet in length and/or 60 pounds in weight can be put out with the Yard Waste for Waste Management to pick up.

Check for Water Leaks

- A good method to check for leaks is to examine your winter water usage. It is likely that a family of four has a serious leak problem if its winter use exceeds 12,000 gallons per month. [US EPA Water Sense website]
- To be sure that you do not have a water leak somewhere in your home, go dry for two hours. Turn off all appliances that use water and do not use any water for the two hours – no toilets, sinks or faucets – inside or outside. Check your meter reading before and after the two hours. If the meter reading changes even a little bit, you probably have a leak and each fixture in your home should be checked.
- Identify toilet leaks by placing a drop of food coloring in the toilet tank. If any color shows up in the bowl before you flush, you have a leak.

A continuous leak at 60 psi water pressure from a hole the size shown below would, over a three month period, waste water in the amounts shown.

<u>Diameter of Stream</u>	<u>Gallons</u>
● 1/4"	1,181,500
● 3/16"	666,000
● 1/8"	296,000
• 1/16"	74,000

Police Department General Information

Animal Reminders: The '2013' Animal Licenses are still available for purchase at \$8.00 per license. Dogs, Cats, and Ferrets need to be licensed in the City of Gibraltar. Bring proof of rabies vaccination to the Gibraltar Police Department to purchase a license at any time.

Dogs cannot be allowed to run loose anywhere in Gibraltar, including City Parks. Pets must be on a leash and under your control at all times when away from your property. If you take your animals for a walk, you must also carry a container to pick up after them.

Fire Department General Information

The City of Gibraltar Fire Department would like to remind you to properly maintain your household clothes dryer. Failure to do so is one of the leading causes of household fires. Follow these *National Fire Protection Association* tips to help avoid the risk of fire:

- Have your dryer installed and serviced by a professional.
- Do not use the dryer without a lint filter.
- Make sure you clean the lint filter before or after each load of laundry. Remove lint that has collected around the drum.
- Rigid or flexible metal venting material should be used to sustain proper air flow and drying time.
- Make sure the air exhaust vent pipe is not restricted and the outdoor vent flap will open when the dryer is operating. Once a year, or more often if you notice that it is taking longer than normal for your clothes to dry, clean lint out of the vent pipe or have a dryer lint removal service do it for you.
- Keep dryers in good working order. Gas dryers should be inspected by a professional to make sure that the gas line and connection are intact and free of leaks.
- Make sure the right plug and outlet are used and that the machine is connected properly.
- Follow the manufacturer's operating instructions and don't overload your dryer.
- Turn the dryer off if you leave home or when you go to bed.

Flood Information

Flood and storm drain brochures for properties that may be in or near Special Flood Hazard Areas in the City of Gibraltar are available at Gibraltar City Hall. Other flood hazard and watershed information is available 24 hours a day, 7 days a week in our information center located in the foyer of the Municipal Complex.

You can also visit the City website, www.cityofgibraltar.net, for a link to the FEMA website. The link can be found on the Home Page under the Watershed heading.

Watershed Information

Storm drains found in our streets and yards empty into our lakes and rivers. When we fertilize our lawn we could also be fertilizing our lakes and rivers. While fertilizer is good for our lawn, it's bad for our water. Fertilizer in our lakes and rivers causes algae to grow. Algae can form large blooms and use oxygen that fish need to survive. With 1.5 million homes in Southeast Michigan, all of us need to be aware of the cumulative affects of our lawn care practices.

Here are seven simple steps you can take in your home and yard to protect our lakes and streams.

- 1. Help keep pollution out of storm drains.** Storm drains lead directly to our lakes and streams. Never dump oil, pet waste, leaves, dirty water, or anything down a storm drain. Remember, only rain in the drain.
- 2. Fertilize caringly and sparingly.** Excess fertilizer that gets into storm drains pollutes our lakes by causing large algae blooms and using up oxygen fish need to survive. Sweep excess fertilizer back onto your lawn, use a low or no phosphorus fertilizer, and have your soil tested to see what, if any, fertilizer is needed.

City of Gibraltar Community Newsletter • 51st Edition

3. **Carefully store and dispose of household cleaners, chemicals, and oil.** Instead of putting hazardous products like antifreeze, motor oil, and pesticides in the trash, down the storm drain, or on the ground, take them to a local hazardous waste collection day.
4. **Clean up after your pet.** Whether on a walk or in your yard, promptly clean up after your pet. Not only will you be a good neighbor, you will also protect our water from harmful bacteria.
5. **Practice good car care.** Consider taking your car to a car wash or washing your car on the grass.
6. **Choose earth friendly landscaping.** Protect your pets, kids, and the environment by using pesticides sparingly. Also, water your lawn only when it needs it and choose plants native to Michigan.
7. **Save water.** Over watering our lawns can easily carry pollution to the storm drains and to our lakes and streams. Consider using a broom instead of a hose to clean sidewalks and driveways. Direct hoses and sprinklers on the lawn, not the driveway. This will help save our lakes and streams and save you money.

For more easy steps on protecting our lakes and streams, visit www.semcog.org.

Remember, our water is our future – and it’s ours to protect!
